President (662) 418-8880 Operator (662) 418-6863 Office (662) 324-7388

1/27/2026

Dear Landowner:

This letter serves as notice that current distribution lines of New Light Water Association, Inc. may not have adequate capacity to add users in **some** locations.

The first step to request a connection is to contact the Golden Triangle Planning and Development District (GTPDD) at [www.gtpdd.com/planning-utility-services](http://www.gtpdd.com/planning-utility-services) or by phone at (662) 324-7860. They will provide you with an application and the User Agreement required to receive water service.

The User Agreement outlines the estimated costs of installing a water line and meter. In some cases, an engineering hydraulic feasibility study—at your expense—may be required to determine if the existing system and proposed lines can provide adequate water pressure to your property.

You are also responsible for obtaining a Certificate of On-Site Wastewater Disposal from the Mississippi Department of Health (MSDH). For more information, visit [www.msdh.ms.gov](http://www.msdh.ms.gov) or call (866) 458-4948, and provide a final copy to the GTPDD along with your application and fees.

Thank you,

New Light Water Association, Inc.
